Dear Sirs,

Enclosed is a tape program and an article which I am submitting to SyncWare News. Please let me know by returning the enclosed postcard whether or not you will publish the article. If you do not wish to publish it, I wish to send it to another TIMEX magazine.

The program allows one to play chess with another person by using a BBS. The article explains in some detail how to use the program, however, the program itself has prompts which tell one how to use it.

I think this program will be very interesting to TIMEX 2068 users, especially now that many TIMEX BBS's are springing up. The program can be used on any BBS.

One other note: I have modified the CASBOARD BBS software so that 100 names, addresses, passwords can be entered at logon. I have also added a clock and other features to the program. Would you be interested in publishing this information? I'll be glad to put it all together and send you the BASIC listing as well as instructions on how to set it up. Of course, the BBS must be run from a disk system.

Sincerely yours,

Charles Stelding

Charles Stelding
